CIRCULAR

In continuation of this office Circular No. IPU/UITS/Circulars/405 dated: 26-12-2019 wherein all concerned were apprised about the status of existing obsolete / end of life / end of support - IT setup of the University and efforts being made by UITS Branch before declared lockdown period for restoration of AMC and new networking setup in the campus.

Though, the UITS Branch had been putting all swift efforts to achieve set goals but due to declared lockdown in view of Pandemic of COVID 19, the pace of work adversely affected. Besides this, rise in climatic temperature and non-working of Centralized Cooling System of the University as per guidelines of Govt. of NCT of Delhi as a security measure against COVID 19 damaged a number of active components of LAN/ WAN Network during lockdown period, which deepened the critical situation of the complete network wherein due to extreme heat in server room, the CORE switch of Network failed and Optic Fiber Cable (OFC) connectivity also got damaged at various locations. However, UITS managed to come up with these worst conditions with alternate arrangements for running the network.

Recently, OFC connectivity has again been observed as damaged in Server Room due to Rat bites causing breakdown of network in various locations of the University. Repairing work of damaged OFC connectivity is being done and shall be completed in first week of August. All concerned are therefore requested to kindly bear with the situation as sincere efforts are being done for upgradation of LAN/ WAN network project for reinstatement of sound IT infrastructure in the University.

(Jitesh Kumar Mehra)
