Specifications

Software Domain / Type	Network Monitoring Software(NMS)
Modules of Network Monitoring Software offered in the scope of supply	Network monitoring ,Network configuration management ,Physical host monitoring

Types of Licence	Perpetual
Duration of Subscription (in months) (Hint :- Select '0' if not applicable)	0
OEM Licensing policy	Per Device
Number of licensing included in the offered product as per OEM defined licensing policy	130

BASIC INFORMATION

Software Domain / Type	Network Monitoring Software(NMS)
Modules of Network Monitoring Software offered in the scope of supply	Network monitoring,Network configuration management,Physical host monitoring
The offered product is	Make in India
OEM Model / Part No	Infraon IMS & NCCM
Software Description	Infraon IMS & NCCM
Software Version & Date of Launch of Version	October 2021

SCOPE OF LICENCE

Types of Licence	Perpetual
Duration of Subscription (in months) (Hint :- Select '0' if not applicable)	0
OEM Licensing policy	Per Device
Number of licensing included in the offered product as per OEM defined licensing policy	130
Scope of Installation	Installation,Configuration
Licence Delivery Mode	Electronic Licence
Platform type	Server based
Hosting Enviroment/ Deployment Option	On Premises
The offered product have support from OEM for	Unlimited updation for Patches and Bug fixes within maintenance & support period,Unlimited upgradation of version within support period
Number of Years for OEM support for updation (Patches and Bug fixes) is included in the scope of supply (Hint :- Select '0' if not applicable)	1
Number of Years for OEM support for Upgradation of version is included in the scope of supply (Hint :- Select '0' if not applicable)	1
Training Options	On-Site
No of days Training Provided (Hint :- Select '0' if not applicable)	2

Network Performance Monitoring

Network Performance Monitoring features	Capable to support visually representing network outages and other error conditions on the topological map,Capable to do trend analysis of stored historical records of network performance data
Number of months for which historical records of network performance data can be stored	3
WAN link monitoring	NA
Monitoring of Network metrics supported by the offered product	Errors,Discards
Monitoring of the health of the network devices supported by the offered product	CPU,RAM,Storage,Server
Supported protocol to communicate the devices	SNMP,HTTP,Ping,SMTP,POP3,WMI,SOAP,REST API,SSH,Telnet

Server Monitoirng

Server Monitoring	Capable to support Virtual Machine, Hypervisor and Cluster monitoring,Capable to monitor availability and performance of web server , email server and database server etc.
Capable to monitor for	NA

Syslog

Syslog	NA
--------	----

Traffic Analytics (Netflow)

Traffic Analytics Features	NA
Technology supported by the offered product	NA
Availability of Support for monitoring of network bandwidth and traffic patterns at	NA

Alerting

Alerting Features	Capable to support alarm notification to notify the administrators when any device/link fault or network performance degradation happens.,Capable to integrated with buyer server for alert notification via E-mail.,Capable to support alarms Suppression capabilities so that any duplicated events can be tracked to provide just a single event notification.
-------------------	---

Reporting and Presentation

Reporting and Presentation Features	Capable to support presentation of availability and performance data over web interface.,Capable to display the topological information in graphical form representing nodes and groups of nodes on a realistic geographical map.,Allow creation of custom maps using available network devices so that the L2/L3 network connections between all selected devices are automatically created.,Automatically group devices into element type, location and severity.,Allow for creation of custom reports in addition to the out-of-the-box reporting templates.,Reporting data capable to export to HTML, PDF, XLS and CSV file formats.,Supported automatic Report generation on an scheduled basis.,Automatically delivering of report via email.
Reporting capabilities	All performance threshold breaches for a specified period of time,All performance threshold breaches for a specified group of devices

Integration

Integration features	NA
----------------------	----

Network configuration management

Configuration Backup	Capable to perform device configuration backup, maintain history by tracking changes, and compare versions from a centralized web GUI.,Capable to perform scheduled backup of configuration from network devices and backup files are to be centrally stored and organized by device and version,Capable to generate alerts for failed configuration backup.,Capable to generate configuration backup reports.
Configuration Management	Automate bulk configuration changes to network devices - create standardized configurations, and use the built-in workflows to review, approve, schedule, and push bulk configuration updates across network devices.,Capable to monitor device configuration and generate alerts when configuration change occurs.,Capable to maintain audit trail of configuration changes: when and where a configuration change occurred, who made the change, and what specific additions or deletions were made to a configuration.,Support compliance auditing of configuration files.,Provision to perform standard compliance checks across all target network devices.

Network inventory management

IP Address Manager	NA
Switch Port Manager	NA
Switch Port Manager Capability	NA
Additional Features	NA

HARDWARE / SOFTWARE REQUIREMENTS AT BUYER END

Minimum Hardware Required at buyer end to run the offered product	24vCPU, 64GB RAM, 1TB HDD
Minimum Software Required at buyer end to run the offered product	NA

GENERIC PARAMETERS

Supported Operating System	Linux
Supported Web browsers	Microsoft Edge,Google Chrome,Mozilla Firefox,Safari,Opera
Supported Database	PostgreSQL
Supported cloud service providers	NA
Hyper link to Data sheet	https://infraon.io
