# AI Speaker Session with Nitish Singh

CampusX

Date: April 2026

## Event report

IoSC EDC organised an Artificial Intelligence speaker session featuring Nitish Singh from CampusX, an AI and machine learning educator with a community of over 500,000 subscribers. The session attracted more than 300 registrations, reflecting the growing interest in artificial intelligence and its practical applications among students.

The session covered topics ranging from foundational concepts to advanced areas such as Large Language Models (LLMs) and machine learning APIs. Adopting a conversational, discussion-oriented format, it encouraged participants to engage actively and seek clarification on emerging technologies and their applications.

The discussion also addressed real-world use cases, career pathways, and industry expectations in AI-related fields. By connecting technical concepts with practical insights, the session helped participants develop a clearer understanding of the evolving AI landscape and the skills required to pursue opportunities in the domain.
