AZINHACK 2026

Elysian 2026 | Flagship technical event

Date: Elysian 2026 (21-22 October 2026)

Venue: University School of Automation and Robotics, GGSIPU East Delhi Campus

Event report

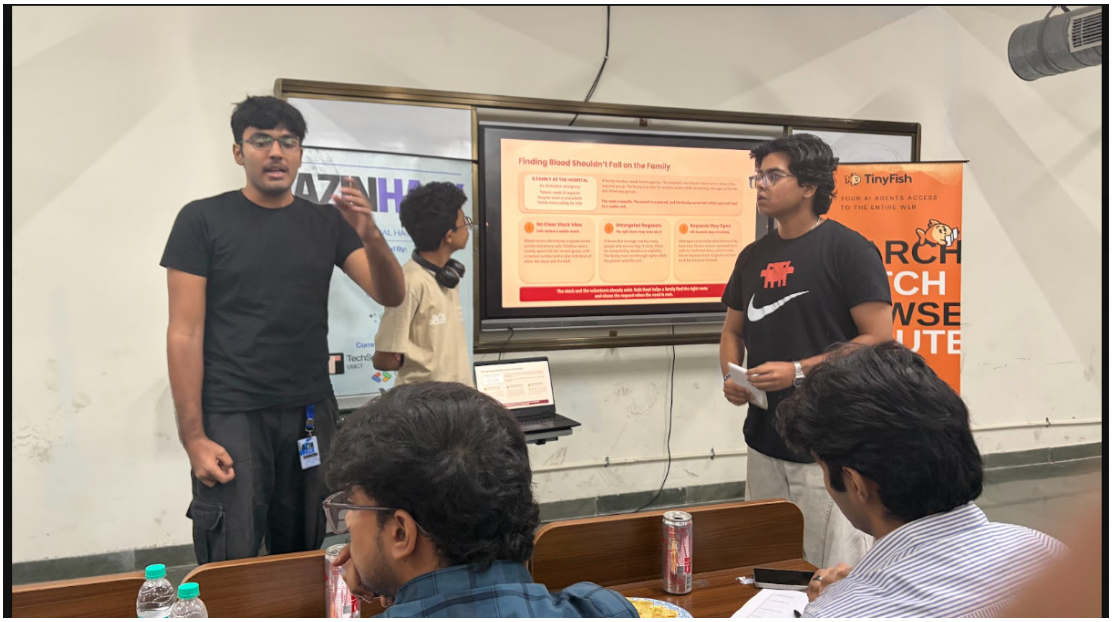

AZINHACK '26 was conducted by the Intel oneAPI Student Club (IoSC), GGSIPU East Delhi Campus, as a two-day technical fest during Elysian 2026 at the University School of Automation and Robotics (USAR). The initiative aims to bring together students from different academic years and branches, providing them with opportunities to innovate, collaborate, compete, and apply their knowledge beyond the classroom.

The flagship event was a two-day hackathon designed to encourage participants to develop practical solutions, work collaboratively under time constraints, and demonstrate their technical capabilities.

A proposed prize pool worth INR 1,00,000, including non-monetary rewards such as merchandise and sponsor goodies, is intended to recognize outstanding performances across the competitive tracks. The proposal also seeks institutional support for venue allocation and specified event requirements, while stating that no monetary funds are being requested from the University administration.

Through AZINHACK '26, IoSC aims to promote applied learning, interdisciplinary collaboration, industry interaction, and student-led innovation, while strengthening the campus's technical and creative community.
