Dock Up

Club orientation and innovation initiative

Date: 29 August 2025

Event report

Dock Up, powered by Docker, served as the official orientation session for students interested in becoming part of the IoSC EDC ecosystem. The event introduced participants to the club's vision, organisational structure, technical domains, and opportunities for learning and professional development.

The session received over 500 registrations, with more than 100 attendees participating in person. Students from diverse academic backgrounds were introduced to the club's specialised teams, including Web Development, Internet of Things, Game Development, and Artificial Intelligence and Machine Learning.

The programme featured interactive discussions, guest lectures, and a technical quiz. Distinguished speakers, including entrepreneur Mr. Siddharth Gupta and IoSC alumna Ms. Renuka Sharma, shared insights into building real-world projects, developing technical skills, and benefiting from community-driven learning.

Dock Up established a welcoming entry point for aspiring members and encouraged students to actively participate in technical projects, collaborative initiatives, and the broader activities of the club.
