Visit to Lenovo Tech World ’26 India Edition

Venue: JW Marriott Hotel New Delhi Aerocity | Date: 11 February 2026

Introduction

Students of the University School of Automation & Robotics (USAR), Guru Gobind Singh Indraprastha University, attended Lenovo Tech World ’26 India Edition on 11th February 2026 at JW Marriott Hotel New Delhi Aerocity. The event showcased Lenovo’s latest innovations in Artificial Intelligence, hybrid AI infrastructure, gaming technologies, smart devices, and enterprise solutions under the theme “Smarter AI for All.”

Objectives

The visit aimed to provide students with industry exposure and an opportunity to:

- Explore emerging developments in Artificial Intelligence and intelligent computing.
- Understand applications of hybrid AI infrastructure, smart devices, gaming technologies, and enterprise solutions.
- Gain insights into industry trends through demonstrations and interactions with technology professionals.

Event Description

The event featured interactive technology demonstrations, AI-powered computing solutions, and industry-focused sessions involving technology leaders, creators, and innovators from across the ecosystem. Students explored Lenovo’s innovations and observed how AI is being integrated into products and enterprise solutions.

Conclusion

The visit provided valuable exposure to emerging technologies, real-world AI applications, and the future of intelligent computing. Direct engagement with technology demonstrations and industry perspectives enriched students' academic and professional outlook. The participation of USAR students reflected the institution's commitment to experiential, industry-oriented learning and to keeping students informed about developments shaping the technology sector.
